The man said he had come as a witness, and that the woman lied. He was hustled into the anti-room in evident fear of his bodily health, for the big woman followed him.

Patrolman Louis Katz, who has not yet won his first stripes, was the first witness of the day. He testified that he and the platoon had received orders from Capt. Doherty to watch Mrs. Thurow's house, get evidence on which to raid in and arrest all the women loitering about the house.

Patterson and Brookfield means more than the mere extinguishment of the Milholland meteor. It may mean the loss of the leadership to Platt.

Platt's efforts this morning were directed towards securing a compromise or a stay of proceedings. He found out that a compromise was out of the question. So he labored with the Committeemen to induce them to submit the question of the regularity of the Platt and Brookfield factions to a sub-committee. It will all depend on Mr. Brookfield if this is done. He has the upperhand. Before entering the meeting-room he said he was in favor of having the matter settled to-day.

It is a foregone conclusion that Mr. Brookfield's side will be declared regular, and his followers do not see that any advantage can be gained by delay. They fear that there may be a trick back of Platt's plea for time. So Platt will in all probability hear his doom to-day.

"At 6 o'clock this morning the temperature was 87 in New York, and at 8 o'clock 72. At 10 o'clock it was 78, and before night, in all probability, we shall have experienced from 85 to 90 degrees of heat, with a general tendency towards the last figure.

"The humidity at 8 o'clock this morning was 82 per cent., and the wind was from the southwest, with a velocity of from four to six miles an hour. This high humidity and low wind velocity, and rapidly rising thermometer, will make to-day pretty hot, close and uncomfortable."

To-day's temperature at 8 o'clock shows the following records: Albany, 74; Hoston, 75; Huffalo, 74; Chicago, 62; St. Louis, 75. The highest was 82, at Key West, and the lowest 52, at San Francisco.

The record of 83 degrees at 11.39 this morning showed that Mr. Dunn's prediction of an increased temperature was rapidly being borne out. It is a gain of just sixteen degrees in five and one-half hours over the 6 o'clock temperature of 67 degrees.
